

LEGAL NOTICE

Barnstable Municipal Airport (HYA) has embarked on the development of a 20-year master plan to ensure that the facility can continue to safely and efficiently meet the aviation needs of the surrounding community. The preparation of an airport master plan is also required by the FAA in order to receive federal funding for airports projects, including rehabilitation of existing infrastructure. The master plan will consider the needs of the airfield, local general aviation, corporate aviation, and commercial aviation over the next 20-years. The plan will also make recommendations for promoting compatible land use around the airport and maximize opportunities for non-aeronautical revenues to help support the airport's financial future.

With the ongoing Covid-19 precautions and because the airport and project team anticipate a high degree of interest from the surrounding community and in the interest of public safety, the content for the first public workshop has been placed online. The airport's YouTube channel (<http://bit.ly/HYAMasterplan>) now features presentations from previous project stakeholder meetings, divided by topic area into short, narrated videos for the public to watch and share. In addition, a dedicated e-mail address HYAMasterPlan@mjinc.com has been set up to receive any questions or comments that the public may have regarding the master plan for the airport.

Comments and questions received by November 2, 2020 will be included in a response to comments and question/answer video that will be added to the channel at a later date. Anyone requesting special accommodations to watch, listen or learn from the YouTube video content can contact the airport at 508-775-2020.
